

Rust & Corrosion Converter

Zen Earth Rust and Corrosion Converter is a breakthrough in the removal of unwanted rust, eliminating rust from iron and steel, without harmful fumes. It works by converting rust into harmless chemical compounds and deposits a protective layer onto the surface to prevent rust from recurring. When the rust is gone, the chemical transformation has occurred, and the surface is prepared for a protective coating, such as paint.

Zen Earth Rust and Corrosion Converter does not require scraping for rust removal. It is fast and easy to apply using a nylon bristle brush, or for large areas, it can be rolled or applied using an HVLP spray gun. There is no need for expensive equipment, keeping the overall costs to a minimum.

Because our product does not use harsh chemicals, it is compatible with many surfaces and will not harm most glass, hoses, decals, plastic, rubber or vinyl, and paints, while remaining safe for workers and the environment. It is mild enough to use on your favorite classic car, yet strong enough to be effective on piping and equipment in a plant.

Zen Earth Rust and Corrosion Converter is a readily biodegradable plant-based solvent that is effective in the removal of surface rust on most painted surfaces. Additional benefits include:

- High potency formula, can be used indoors
- Converts rust without smoke or fumes
- Prepares metal surface for paint and increases lifespan of paint job
- Compatible with most vehicle paints, decals, wiring and hoses
- Formulated from a variety of readily available plants and naturally occurring minerals.
- Fully biodegradable, and will not contaminate or pollute the environment
- Non-flammable
- Non-hazardous chemical, and there are no special handling procedures required
- Safe to wash into drains and waste systems

ZEN EARTH PRODUCTS ARE:

Bio-Based
Readily Biodegradable
Non-Toxic
Non-Corrosive
Non-Hazardous
Non-Caustic
Non-Flammable
Non-Cancer Causing

DO NOT CONTAIN:

Ozone Depleting
Substances
Petroleum Distillates
Glycol Ethers
Caustics
California Proposition
65 Chemicals

The active ingredients behind all "green" Zen Earth cleaning, solvent and lubricating products are combinations of various readily biodegradable plants and naturally occurring minerals. Zen Earth's proprietary, renewable, chemical/mechanical process creates a truly unique product that is safe for human use and for the environment. It is effective and versatile.

All Zen Earth active ingredient formulas are effective as a result of the creation of electrically charged particles known as micelle. When activated in water, micelles repel each other in a ceaseless random movement. Measuring only 2 – 4 nanometers in size, their extreme surface-area-to-volume ratio enables far greater efficacy than conventional technologies or formulas. Micelles do not produce a chemical reaction that generates new compounds when introduced into another material or the environment, instead they break down carbon based compounds into smaller particles that can be easily assimilated and metabolized by normal soil or water microorganisms.
